

## Over 10,000 organic standards and unique materials

Our comprehensive portfolio of organic standards and materials is designed for environmental, food and other analytical testing applications. Our core expertise includes the manufacture of:

- ▶ Pesticide and metabolite reference materials
- ▶ PCB's, PAH's
- ▶ Phthalates
- ▶ Hydrocarbons
- ▶ Solutions for use with EPA, EN, DIN, and other standard methods
- ▶ Custom solutions and mixtures

Reference materials are clearly labeled with an expiration date that is based on years of experience in handling and testing.

Products are packaged in small quantities to minimize storage, waste, and disposal requirements.

More than 95% of our Neat Standards Grade products have a purity of 98% or greater and do not require purity corrections when preparing solutions for use with EPA, USTM, UST, and numerous other international methods.

## Focus on Quality

Chem Service products have been manufactured and tested under the following certifications for more than 12 years:

ISO 17034

ISO/IEC 17025

ISO 9001

## Trusted for more than 60 years

Founded in 1962, our U.S. based manufacturing center has been a trusted provider of analytical standards and partner to testing labs for decades.
